Erikson's Psycho-Social Theory of Development

Erik Erikson

- Born in 1902 in Jülich, Germany
- General Developmental Psychologist
- Studied at Harvard, MIT, and the University of California, Berkeley
- Died in 1994 in Belmont, California

The 8 Psycho-Social Stages of Development

INTRODUCTION TO THE 8 STAGES

Psychosocial development is the process by which an individual's personality is shaped by the interaction of biological maturation, environmental influences, and the individual's own experiences. Erikson's theory of psychosocial development is a key concept in understanding how these factors shape a person's personality and behavior.

2 DISPOSITIONS:

- SYNERGIC - POSITIVE
- SYNERGIC - NEGATIVE

4 Factors:

- If both dispositions are met, personality will be developing
- MALADAPTATION is MALADAPTIVE
- VIRTUES are being earned if a stage is managed well

Generativity vs Stagnation

Intimacy vs Isolation

Autonomy vs Shame and Doubt

Industry vs Inferiority

Ego Integrity vs Despair

Initiative vs Guilt

Identity vs Role Confusion

Basic Trust vs Mistrust

"It is human to have a long childhood; it is civilized to have an even longer childhood. Long childhood makes a technical and mental virtuoso out of man, but it also leaves a life-long residue of emotional immaturity in him."

— Erik Homburger Erikson (1902-1994)
